

Mother's Update

June 6, 2020

Hello everyone,

Just a quick covid-19 update. All is well here; we have no cases of the coronavirus, thanks be to God.

We continue to be diligent in our efforts to protect the Residents, and must still adhere to a strict no-visitor policy. We have increased our one-on-one interactions with residents, and bring individual activities to their rooms since we are still unable to have group activities and communal dining. These regulations continue to be more stringent because, as you know, nursing homes in general are still very much at risk for the virus.

The recent sunny weather has been a God-send, and the residents have really enjoyed spending time outside on our beautiful grounds. It has been a welcome relief after so much time being indoors. It is heart-warming to see how attuned so many of our staff are to our residents' needs, spending quality time with a resident outside on their break, or using the outside as a setting for physical therapy or individual activities. With the dawn of each day, the grounds are looking more and more beautiful. With all of the rain, and now the sunshine, the flowers are just exploding with vibrant colors. Our gardener and landscaper, Nancy, does a fantastic job on the grounds, and it is easy to see that she puts her heart and soul into making a lovely space, one that highlights the glory of God's creation, for everyone to enjoy.

We continue to receive donations of items that we need for our residents, and are grateful for everyone's generosity! It is touching to see how so many people freely share what they have, even during times of shortages and fear.

God bless you,

Mother Margaret
